"My stroke of insight"

Jill Bolte Taylor ist Neuroanatomin an der Indiana University School of Medicine in Bloomington, Indiana. 1996 hatte sie einen schweren Schlaganfall, ihre Genesung dauerte sieben Jahre. In einem bewegenden und sehr persönlichen Vortrag (der auf TED-Talks zu sehen ist) beschreibt sie, wie sie den Schlaganfall erlebt hat und welche Konsequenzen sie daraus als Hirnforscherin für sich gezogen hat. Hagen Böser hat mich auf diesen Link aufmerksam gemacht, herzlichen Dank dafür...

I read "My Stroke of Insight" in one sitting - I couldn't put it down. I laughed. I cried. It was a fantastic book (I heard it's a NYTimes Bestseller and I can see why!), but I also think it will be the start of a new, transformative Movement! No one wants to have a stroke as Jill Bolte Taylor did, but her experience can teach us all how to live better lives. Her TED.com speech was one of the most incredibly moving, stimulating, wonderful videos I've ever seen. Her Oprah Soul Series interviews were fascinating. They should make a movie of her life so everyone sees it. This is the Real Deal and gives me hope for humanity. Comment (1)

The New York Times Sunday Newspaper on May 25 had a great two page article on Jill Bolte Taylor and her book, "MY STROKE OF INSIGHT". Her book is a must read and this NY Times article - called "A Superhighway to bliss" is worth checking out too. Comment (1)
